Independent domains: separate credentials and administration
Customer confirmation
Recipient, amount, asset, network
confirm payment
Intent authority
Authenticates payment; checks and reserves balance
Governance
Policy epochs, budgets, signer set, recovery
1 signed intent I
budgets $B_{e,k}$
assumed compromised domain
Withdrawal backend
Builds proposed bytes T; potentially compromised
2 bytes T
Independent signers
Decode exact bytes; check intent, evidence, reservation
3
5 reserve
State authority
One-use IDs; reserved capacity (budgets)
6 signature
certificate
7 broadcast
4 fresh result
pause / hold
Blockchain network
Broadcast and reconcile settlement
Evidence verifier
Workload identity and evidence appraisal
Behavioral alerts
May pause or hold; never grant authority
authorization / data flow
restrictive or administrative
assumed compromised
n step
